

AJAY BALONI

Full Stack Developer

Mohali, Punjab • ajaybaloni01@gmail.com • +91-8937944046 • [LinkedIn](#) • [GitHub](#)

TECHNICAL SKILLS

Frontend: React.js, Redux, TypeScript, JavaScript, HTML, CSS, Vite, Bootstrap, Tailwind

Backend: Node.js, NestJS, Express.js, REST APIs, JWT Authentication, Prisma

Database: PostgreSQL, MongoDB, Redis

Cloud & DevOps: AWS EC2, Docker, GitHub Actions (CI/CD), Vercel, Render, Cloudinary, Neon

Developer Tools: Git, Github, VS Code, Postman, Claude code, Codex

AI Skills (Exploring): Agentic AI, RAG pipeline, GenAI, MCP, LangGraph, Gemini API

PROFESSIONAL EXPERIENCE

Full Stack Developer

Jan 2024 - Jun 2026

Vergado Technologies Private Limited

React.js • Node.js • Express.js • PostgreSQL • Prisma • REST APIs • JWT • Gemini API

- Full-stack engineer on a production B2B SaaS HRMS platform serving 30+ enterprise clients, delivering features end-to-end across Node.js, PostgreSQL, and a React frontend.
- Developed scalable, responsive React.js applications with tenant-aware architecture, enabling feature customization based on client-specific configurations across multiple HRMS modules.
- Designed and consumed RESTful APIs, integrated SSO authentication, and implemented client-side encryption for sensitive fields to meet data-security requirements.
- Independently built an end-to-end AI document assistant (RAG pipeline) — backend APIs, Gemini integration, and pgvector semantic search over company-uploaded PDFs — along with the chat UI.
- Built interactive Recharts dashboards and client-side document generation (PDF/Excel/Word) for payslips and reports.
- Improved performance through code splitting, lazy loading, and React.memo/useMemo/useCallback; hardened sessions with duplicate-tab detection and idle-timeout tracking.

PROJECTS

Webhook Gateway & Observability Dashboard • github.com/Ajay-Baloni/Webhook-Gateway

NestJS • PostgreSQL • React/Vite • Docker Compose • Prisma

- Built a self-hosted webhook gateway with at-least-once delivery using a PostgreSQL job queue (SELECT ... FOR UPDATE SKIP LOCKED) for safe concurrent processing — no Redis required.
- Implemented exponential backoff with jitter, per-route retry policies, dead-letter queue, and one-click replay for failed deliveries.
- Secured the ingest endpoint with HMAC-SHA256 constant-time signature verification and idempotency-key deduplication to block forged and duplicate events.
- Built a real-time React dashboard showing throughput, success rates, and per-attempt delivery timelines; full stack containerized with Docker Compose and automated Prisma migrations.

Website Analytics Assistant — AI Agent for Root-Cause Analytics

LangGraph • SQL • Express.js

- Built an autonomous LangGraph agent that answers plain-English questions (e.g., "Why did sales drop yesterday?") using a cyclic plan → investigate → evaluate → synthesize state machine that forms and tests hypotheses to pinpoint the affected segment with real numbers.
- Bound analytical tools to the LLM via function-calling over parameterized SQL, so the model orchestrates the investigation while every metric comes from trustworthy database aggregates rather than hallucinated output.
- Designed custom LangGraph state with reducers, tool-call and reflection-loop caps, and MemorySaver checkpointing for multi-turn follow-ups; streamed live agent reasoning to the UI over Server-Sent Events.
- Built a drop-in JavaScript tracker (single script tag) that auto-captures page views, clicks, and time-on-page — including SPA route changes — feeding the event data the agent reasons over.

EDUCATION

Bachelor of Technology 2023 • 73%

Computer Science • THDC Institute of Hydro Power Engineering and Technology • Tehri Garhwal, Uttarakhand

Intermediate & High School 2019 • 87% / 81.2%

PCM • SVMIC Srikot Ganganali • Pauri Garhwal, Uttarakhand
